WHO WE ARE

Adamar was founded in 2003 in Aliaga/Izmir by Mr. Taner Topkara, who has been the President since the beginning, to serve and supply the vessels calling Turkish Ports & Straits. Over the years, thanks to the commitment of our qualified & experienced staff, whose hard work has enabled us to quickly adapt to the ever-changing demands of the ship supply industry, we proudly managed to become a sector leader in the region and expanded our presence worldwide.

The journey started with minimal capacity and manpower, nowadays extends to more than 500 employees, four national (Izmir, Istanbul, Bosphorus, Mersin), and five international offices (Shanghai, Hong Kong, Singapore, Piraeus, Rotterdam), and more than 20000 m2 aggregate storage capacity.

We are proud to be a member of ISSA, IMPA, TURSSA, and TRADE NET. Being certified with ISO9001, ISO22000, ISO14001, and ISO45001, we run our business in full compliance with international regulations and quality, safety & environmental standards.

Our dynamic, solution-oriented and competent team quickly evaluates and processes your inquiries, submits our quotations with the most competitive prices, provides the comfort of 24/7 accessibility and executes on-time deliveries and operations in all ports, terminals and seaways of Türkiye.

Go Confidently with us...

WHAT WE DO

Adamar is a multidisciplinary ship supply and service-providing company that manages to harmonize different divisions under one roof. We offer top-quality provision, specific products imported to make the crew feel at home, consumables with optimum quality and price, and unrivaled service quality.

Adamar also offers stock availability of non-standard items, e.g., marine valves, anchors & chains, spare parts, cargo care products, and special fabricated items. Our skilled and experienced service teams offer a broad range of repairs & services and remote assistance whenever needed.

When you appoint your service provider as Adamar, you have the privilege to access a world-class service, a team that communicates with you in marine language and a carefully selected stock with more than 10,000 different items procured from various corners of the World. Please take a look at our catalogue to have a more profound idea about us.

GENERAL STORES & CONSUMABLES

We stock a wide range of products which are carefully selected to provide our customers with optimum quality at competitive prices. More than 10,000 types of products are readily available for supply on our shelves.

- Deck Stores
- Engine Stores
- Cabin Stores
- Electrical Stores
- Nautical Equipment & Stationery
- Safety Equipment (LSA & FFE)
- Anti-Piracy Equipment
- Marine Paints & Application Equipment
- Marine Chemicals
- Hydroblasters & Associated Spares
- Medicines & Medicals

OUR BRANDS AND INVESTMENTS

We are committed to provide excellent service by following the on going global demand and prioritizing new investments to effectively meet our customers' requirements.

- Adamar Marine Valves
- Adamar Workshop
- Adamar Anchor & Chain
- Adamar Services
- Power & Instrument Cables
- Container Lashing & Cargo Care Equipment
- Mooring Lines & Riggings
- Packings & Sealants

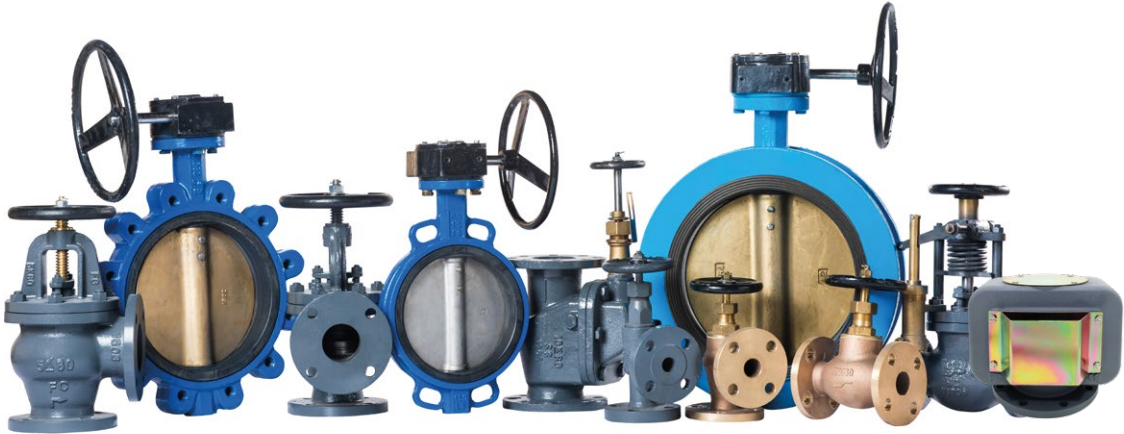

MARINE VALVES

ADAMAR VALVES proudly serves its customers with an extensive & comprehensive stock of typical marine valves. All, our products meet the JIS and DIN standards and are certified by DNV. Our broad product range includes all types of bronze, cast steel, and cast iron material: Globe, Gate, Storm, Butterfly, Hose, and other common marine valves. They are being manufactured by DNV, ABS, NK, BV & LR Class approved manufacturers.

An expert team in this field is ready to support you in all Turkish ports & straits, particularly in the Istanbul region, Tuzla and Yalova Shipyards, where we can provide 24/7 expert product advice and same-day supply.

At the same time, we provide a worldwide supply of our products from our warehouses in TURKIYE, EUROPE, CHINA, KOREA and SINGAPORE. No matter where your vessel is trading, contact us. We will ensure your order is dispatched as soon as possible and safely reaches your vessel on time. If you are asking for high-quality, cost-effective products and on-time delivery, all you should do is rely on us & join us...

ANCHOR & CHAIN

Finding stock availability for marine anchors, anchor chains, and joining accessories is usually a big challenge. Especially vessels conducting repairs in shipyards, are frequently asked to renew their anchors and chains when their existing equipment is damaged and/or worn beyond allowable limits. While many owners are facing issues even locating such equipment, Adamar customers feel no hassle and enjoy the confidence of having such a strong partner behind their backs.

OUR STOCK COMPRISES OF THE FOLLOWING PRODUCTS

AC-14 High Holding Power
Anchors, weight from
3.040 kgs to 11.000 kgs

Spek Stockless Anchors,
weight from 6.000 kgs to
9.900 kgs

Studlink Anchor Cable
Chains, Grade 3, size from
40 mm to 102 mm

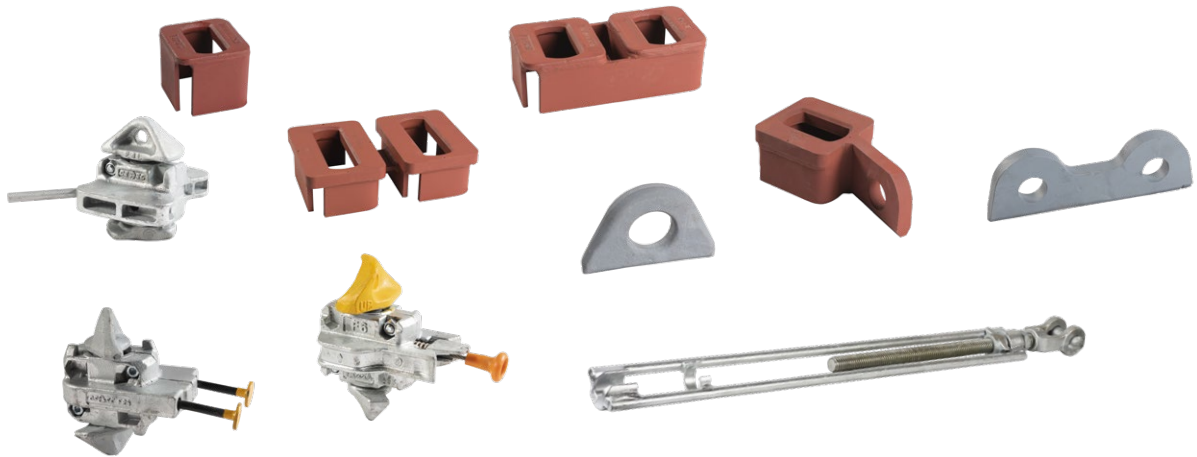

Kenter Joining Shackles,
Grade 3, size from 40 mm
to 102 mm

Swivel Forerunners,
Grade 3, size from 40 mm
to 102 mm

Anchor D-End Shackles,
Grade 3, size from 40 mm
to 102 mm

Swivel Shackles, Type-B,
Grade 3, size from 50 mm
to 81 mm

CONTAINER LASHING EQUIPMENT

As Adamar, we aim to assist our customers with an extensive range of products with a strong stock level at all times. To provide the best services to the container operators & owners, we keep a very large numbered and comprehensive stock of container fixing items readily available in our warehouses. Since the proper securing of containers on board is essential for the safety of cargo, crew, vessels and the environment, we only procure IACS-certified stock from IACS-approved manufacturers. Our procurement team regularly audits selected manufacturers by directly visiting their premises, monitoring the manufacturing processes of each item making sure that their quality meets our requirements, customer demands and international standards.

IACS CERTIFIED HIGH-QUALITY PRODUCTS

You may find a brief list of our stock items as below:

Twistlocks

Stackers

Turnbuckles

Lashing Rods

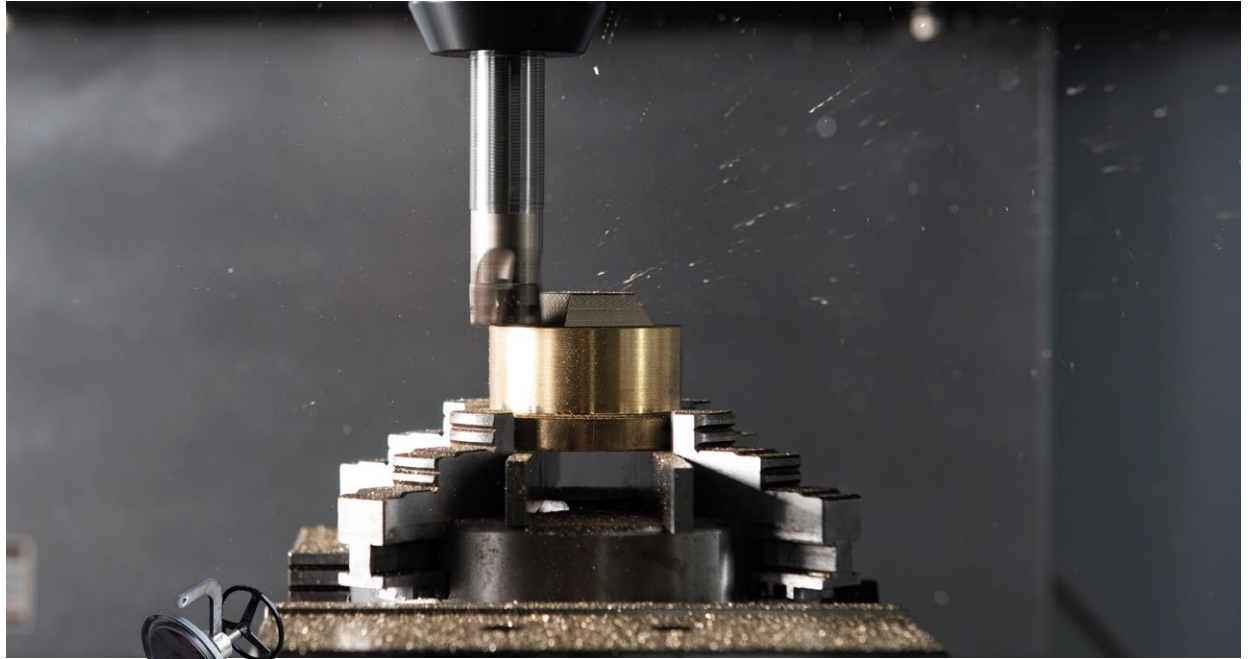

Single & Double
ISO Foundations

Sliding Foundations

Lifting ISO Foundations

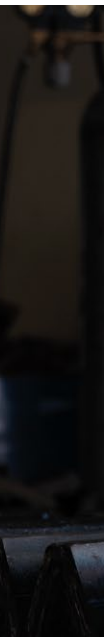

Lashing Plates

Lubripad & Holder
Assembly

IN-HOUSE

It was 2018 when we initially established our in-house workshop to support Adamar Valve's operations. Since our initial plan was only related to the revision & conversion of the valves, we slowly started receiving projects from our Shipyards Division. We had a chance to test ourselves in fabricating various marine-related parts. When we moved our primary premises to Tuzla Birlik OSB in 2022, we separated the 1000 m2 section of the Warehouse only for the workshop settlement. We purchased more computerized and sophisticated equipment to be more productive and cost-efficient for our clients. Among all other conventional equipment, nowadays, we own and operate CNC Laser Steel Cutting Machines, CNC Vertical Machining Center, and CNC Lathe in our workshop under one roof. Thanks to our high-tech equipment and highly qualified personnel, we are capable of fabricating even the most tricky parts in a very short period and substantial quantities at the same time.

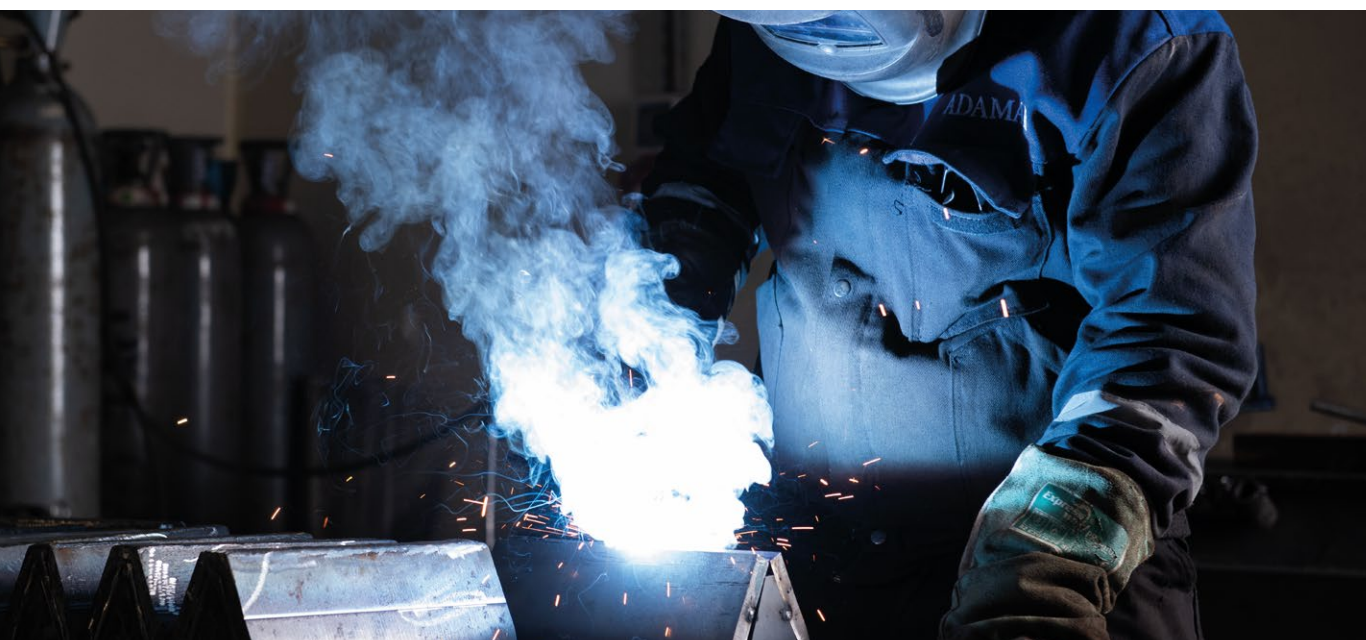

List of items fabricated are as follows:

- Pipe Sections & Spools
- Weathertight Doors & Hatches
- Bobby Hatches
- Tank Manhole Covers
- Mushroom & Gooseneck Ventilations
- Bollards, Pedestal Roller Fairleads
- Crane Sheaves & Sheave Pins
- Seachest Filter Casings & Stainless-Steel Strainers
- Hydraulic Square Flanges & Associated Fittings
- Hawser Reels & Their Breaking Mechanisms
- Lashing Bins & Flatracks
- Hatchcover Guides & Handrails
- Hatchcover Restpads/Lubripads, Raised
- Holders and Associated Accessories
- Pump Shafts, Wear Rings & Impellers
- Any Kindy of Welded & Machined Parts

WORKSHOP

FABRICATION OF VARIOUS MARINE RELATED PARTS

Our technical services program is operated and supervised by our marine background staff (Master Mariners and Chief Engineers) to achieve the best quality with cost and time-effective results. When a service inquiry is received, our team evaluates and understands customers' expectations and provides a valid plan at reasonable and competitive rates. To achieve the best result, we both use our boarding team and cooperate with our approved third-party workshops and technicians whenever it is needed. The Riding team with Seaman's Book and Schengen visa is also a good option for the customers who need their vessel operating while the repairs are ongoing.

REPAIR & SERVICES

List of services provided are as follows:

- M/E and A/E Repairs and Overhauls
- Annual & 5-Yearly Inspections of FFE & LSA (SCBA, EEED, Fixed FFE, Portable FFE, etc.)
- Annual & 5-Yearly Inspections of Liferafts, Lifeboats & Davit Inspections
- GMDSS & Bridge Equipment Inspections, Radio Surveys, Services and Spare Parts Supply
- Calibration & Certification of Various Types of Equipment (ODME, 15 PPM, Other Various Sensors & Gauges)
- Class Approved Underwater Hull Inspections & Temporary Overboard Pluggings
- UTM (1st, 2nd, 3rd SS with IACS Class Approved Companies), Ultrasound Test and NDT
- Seachest and Propeller Cleaning, Anode Installation
- Fabrication, Repair & Installation of Class Approved Accommodation & Pilot Assist Ladders
- Fabrication of Ship Specific Structures and Fittings (Manholes, Access Hatches, Ventilation Openings, Windlass Parts, Ship Specific Piping & Fittings)
- Anchor & Anchor Chain Cable Replacement
- Cargo Hold Cleaning & Coating Services
- Accommodation A/C Repair Service
- Cargo Hatch Cover Ram Overhaul & Rod Replating
- Incinerator & Boiler Repairs and Services
- Governor Overhaul and Exchange
- PLC & PCB Card Repair and IT Services
- Certified Steel Plate Renewal and WPQR/WPS Certified Welding Jobs
- Tank Radar and Cargo Monitoring System Repair
- Propeller Boss Cap Fins Installation (PBCF)

MOORING LINES & RIGGINGS

BEST QUALITY & EXTENSIVE STOCK...

To be a one-stop shop for our customers, we keep different types and sizes of mooring lines with direct stock availability. Thanks to our strong stock level and qualified personnel, we manage to support any customers' needs and be the sole partner in terms of mooring line requirements. We can also arrange tailor-made mooring line solutions for our customers within a very short time and can make very quick deliveries.

Mooring Lines in Stock

MAXIMA

Material	: HT Polypropylene
Line Constructions	: 8 Strand
Certification	: OCIMF MEG4
Preferred Application	: Mooring Ropes
Manufacturer	: Garware Technical Fibrest

x2

Material	: Polyolefin
Line Constructions	: 8 Strand
Certification	: OCIMF MEG4
Preferred Application	: Mooring Ropes
Manufacturer	: Garware Technical Fibres

KARAT MAXI PLUS

Material	: Estalon – Eurolefin
Line Constructions	: 8 Strand braided or 12 Strand
Certification	: OCIMF MEG4
Preferred Application	: Mooring Ropes & Tails
Manufacturer	: D. Koronakis SA

KAPA FLOAT 12/24

Material	: 25% H.T Polyester 75% H.T. Polyolefin
Line Constructions	: 12 or 24 Strand
Certification	: OCIMF MEG4
Preferred Application	: Mooring Ropes
Manufacturer	: D. Koronakis SA

KAPA FLOAT SbD

Material	: 25% H.T Polyester 75% H.T. Polyolefin
Line Constructions	: 12 Strand with Snap Back Defending Core
Certification	: OCIMF MEG4
Preferred application	: Mooring Ropes
Manufacturer	: D. Koronakis SA

STRONG 8

Material	: 50% H.T Polyester 50% H.T. Olefin
Line Constructions	: 8 Strand braided
Certification	: OCIMF MEG4
Preferred Application	: Mooring Tail
Manufacturer	: D. Koronakis SA

MOORING LINKS

Tonsberg Shackles with DNV MEG4 approval	
Mandal Shackles with DNV MEG4 approval	
Manufacturer	: D. Koronakis SA

MOORING WIRES

Material	: Drawn Galvanized, RHRL and Lubricated, Grade: 1960N/mm2
Line Constructions	: 6x36+1WRC
Certification	: OCIMF MEG4
Preferred application	: Mooring Ropes
Manufacturer	: D. Koronakis SA/Greece

Mooring Fittings

It has always been difficult to locate and source mooring fittings with direct stock availability for the owners. By hearing our customers' requests, we invested in mooring fittings to provide prompt supply solutions for same-day delivery. Since many suppliers can not even offer that equipment, Adamar is capable of supplying the best quality mooring fittings with an IACS certificate direct from our Istanbul stock.

[ISO13776-2020 Pedestal Fairleads with ISO13755-2020 Steel Rollers](#)

[ISO13795-2020 Welded Steel Bollards](#)

Shipboard power & instrument cables are the arteries and capillaries of the vessels, and they are used throughout every structure of vessels, similar to the human body. As the cables are inevitably used during new building stages of the vessels, they are also commonly needed for existing vessels when they undergo retrofits such as BWTS and scrubber installations or during repairs after some incidents. Driven by the motivation of being a one-stop supplier, we decided to build our cable stock to meet increasing customer demands. We have been running our Cable Division since 2018 and managed to fulfill many successful domestic and international deliveries.

MARINE POWER & INSTRUMENT CABLES

CONNECT WITH THE NEW HORIZONS

Our stock cables are divided into following categories:

- M2XCH 0.6/1 (1.2) kV Low Voltage Power Cables
- M2XCH EMC 0.6/1 (1.2) kV Low Voltage Power Cables
- M2XCH FE180 0.6/1 (1.2) kV Low Voltage Fire-Resistant Power Cables
- M2XCH VFD 0.6/1 (1.2) kV Low Voltage Power Cables
- FM2XCH 150/250 (300) V Instrument Cables
- FM2XCH FE180 150/250 (300) V Instrument Cables
- IACS Approvals: DNV, ABS, LR, BV, RINA, TL

Liquid tightness, both oil and water, is significant for marine operations. While insufficient packing quality may cause various types of cargo damage, bad-quality sealants and packings may result in the suspension of machinery operations and catastrophic pollution. As cargo safety and operational continuity are the primary targets of maritime transportation, we created the division in 2018 to produce, import and supply high-quality products at cost-effective prices to the industry.

By the beginning of 2024, we started operating a modern factory for the production of high-quality hatch cover packings in different forms, various types of NBR products, and CNC-made ready-to-use products.

Our products are divided into the following main categories:

- High-Quality Hatch Cover Packings
Manufactured by Adamar
- Packing Sheets & Bars (Non-Asbestos, HT Resistant, PTFE, Rubber, Viton)
- Door, Manhole, Tank Dome Packings
- Tailor-Made Packings and Gaskets
- Anti-Splash Tapes
- Various Types of Adhesives, Sealants, Pastes and Technical Liquids

VARIETIES OF HIGH QUALITY PRODUCTS

SHIPYARD ATTENDANCE

Professional assistance is always indispensable for dry-docking vessels. While superintendents and crew are very busy with many different maintenance jobs, they mostly need to feel a trustworthy partner next to them who provides correct, fast and cost-effective supplies and services to minimize docking period and total expenses.

With the above motivation, we offer a dynamic team of colleagues with marine backgrounds who speak the marine language with the superintendents and the crew. We promise a dedicated person supported by a complex organization behind, appointed for only your vessel to follow up on your day-to-day operations, collect samples and inquiries, provide the fastest, correct and most competitive quotations, organize the fastest deliveries to ensure uninterrupted repairs and maintenance on board.

If you need assistance from a highly skilled marine professional during your shipyard period, you may invite one of our colleagues by sending an e-mail to "shipyards@adamarine.com."

We are ready to be your best partner during the dry-docking period..

PROFESSIONAL ASSISTANCE

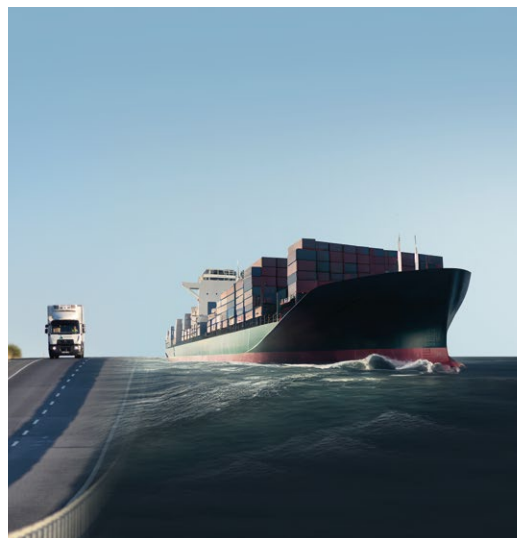

Our specialized Marine Logistics Department assists our customers with a wide range of services which include:

- Ship's Spares in transit customs clearance, storage and delivery onboard your vessels in all ports & straits of Turkiye.
- Landing of spares from vessel, storing & forwarding them to desired destination by most convenient mode of transport.
- Exporting and forwarding your orders from our warehouses in Turkiye to desired destination by most convenient mode of transport
- Collecting your orders at origin, forwarding them to our warehouses in Turkiye and delivering them onboard at requested port.
- Collection of Fuel Oil, Lub Oil and other samples from vessels and forward them to global laboratories for analysis.
- Landing and shifting of spares from one vessel to another in all ports & straits of Turkiye.

We provide safe & temporary free storage of your spares in our freezone warehouse as well as combine the delivery of your "ship's spares in transit" with the supply of stores and provisions orders placed with us which is cost saving for our customers.

SHIP SPARES IN TRANSIT

PROVISIONS & BONDED STORES

WIDE RANGE OF PRODUCTS

We offer a wide range of international & local food products, which are stocked in the most optimum conditions available in the ship supply industry nowadays. The quality of our products is our top priority; therefore we make sure they are supplied to your vessels in optimum condition. We own separated wall trucks, which enables transportation of our products under correct & controlled temperature and therefore unbreak the cold supply chain.

Cooling temperature of our refrigerated trucks is electronically monitored & the truck temperature data is regularly recorded & stored. We can easily provide you with the temperature data whenever required after the delivery. Besides, we own a 10ft reefer shipping container which is used to store provisions & other perishable goods during our offshore supply operations. In order to ensure fresh & colorful supply of the fresh seasonal fruits & vegetables as they are, we purchase them from local wholesalers on the day of delivery. We also make sure that our products are properly packaged & labelled.

Frozen Products

- Meat (Beef, pork, lamb, mutton...)
- Fish (Mackerel, milk, tilapia, redsnapper...)
- Vegetables (Broccoli, cauliflower, mixed vegetables...)
- Salami Sausages (Frankfurter, polish, mortadella...)
- Poultry (Chicken, duck, turkey...)

Dry Products

- Canned Milk (Condensed, evaporated, coconut...)
- Canned Fish (Sardines, tuna, mackerel...)

ATLANTIC OCEAN

In the past, a Blue Riband was awarded to Captains who could cross the Atlantic Ocean. It was a sign of how skilful a sailor was. Because only brave Captains could fight against the dangerous storms of this ocean.

With our advanced technical and repair services for today's brave Captains, the seas are as safe as the coasts.

**MAY YOUR WINDS BE ABUNDANT
AND YOUR ROUTE SAFE.**
